

## About the company:

Proxxi Technology is a Vancouver start-up designing and manufacturing industrial safety solutions with products in-market for over 4 years. Founded by hardware engineers, Proxxi Technology's electrical safety wrist-wearable device remotely detects dangerous electrical voltages and warns the wearer before electrical contact injuries occur.

Proxxi Technology Corporation is currently looking for the right individual to join our team as a Manufacturing Technician.

## Job description:

Join an organization with a social work environment and easy transit access!

Proxxi is building smart watch devices to help keep electrical workers safe, and we're looking to hire someone reliable with attention to detail and crafting quality products.

We're looking for help two or three days per week with the work day lasting 4 to 8 hours. Hours and days of work are flexible. No work on weekends, except with your agreement.

Responsibilities at work will involve: loading manufacturing jigs, soldering fine wire assemblies, hotmelt assembly, epoxy application, and packaging.

*\* Soldering experience is ideal, but can be taught and learned on the job. If applicable, please share an example of a craft or soldering project that demonstrates competency.*

## What you'd be doing:

### *Manufacturing:*

- Load / unload jigs
- Solder charger and pod coils
- Heatstake assemblies
- Epoxy application

### *Packaging:*

- Packaging assembly

## Time commitment:

- 2-3 days per week, 4-8 hours per day (not including breaks)
- *Total of 15-30 hours per week*

## Why join:

- Work/life balance
- Great experience in a start-up environment
- Supportive leaders and colleagues
- Opportunities for advancement as we build out manufacturing and scale assembly to meet growing customer needs and product development
